

Blockchain Identity &
Token Ownership
Validation

Presentation
Q4/2023

Why

User Authentication and Token Validation
through Wallet Interaction
is still a big pain Point and prevents
Mass Adoption.

What

Tokiphy is a Blockchain based Solution to validate User Identity and Token Ownership without requiring direct Wallet Access.

Problem

Lack of inter-
operability

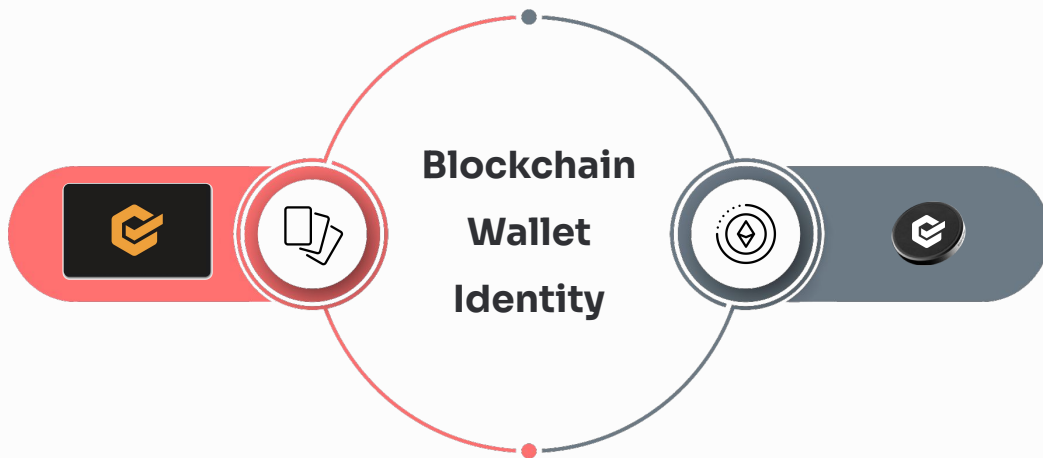

Complex

Slow

Unsecure

Blockchain users need Wallet Access
through a Computer or a Smartphone
to prove User Identity and Token Ownership!

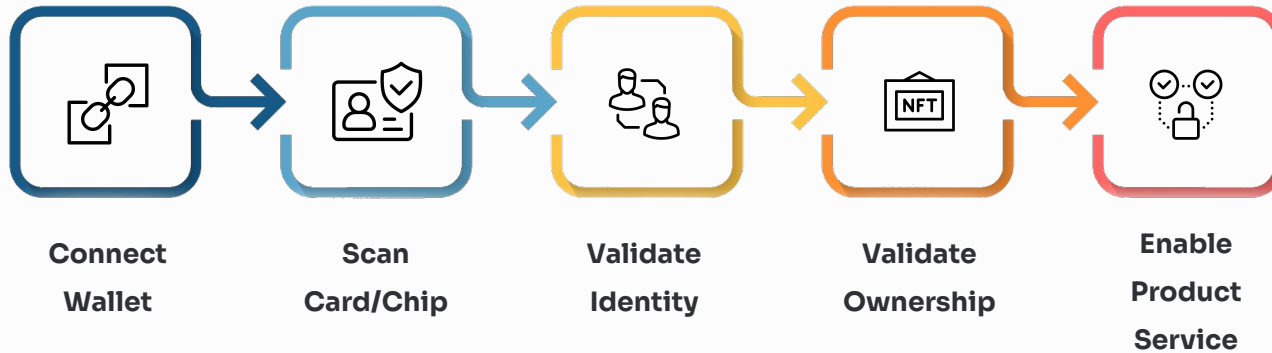

Meet the Tokiphy Card and the Tokiphy Chip.

How

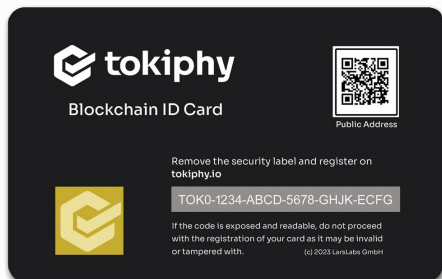

We validate Blockchain Identity and Token Ownership without direct Wallet Access.

User Onboarding

One of the Fastest, Secured and Simplest Solutions.

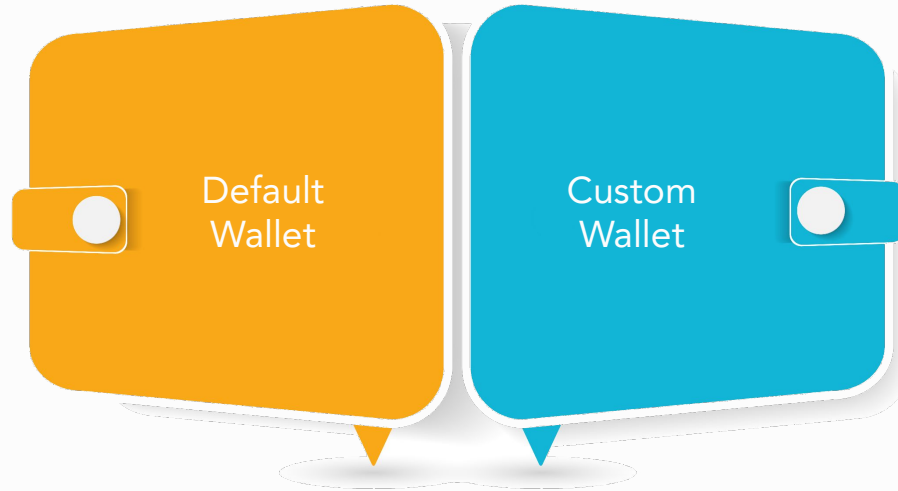

1. Register the Tokiphy Card/Chip
2. Use Default Wallet
3. Connect Custom Wallet
4. Enjoy Products and Services

Multi-Wallet / Multi-Chain Solution

Ethereum | Polygon | Binance Smart Chain
(more are coming soon)

Tokiphy Users
can claim wallet ownership
including PK export.

Tokiphy Users
can connect their
existing wallets.

Tokiphy already comes
with three wallets
pre-assigned.

Metamask,
Wallet Connect,
Coinbase

Hardware

- Tokiphy Card
- Tokiphy Chip
- POS Readers
- Access Control Systems
- IOT Solutions

Services

- Tokiphy Validator
- Smart Contract Interaction
- API Endpoint Service

Advantages

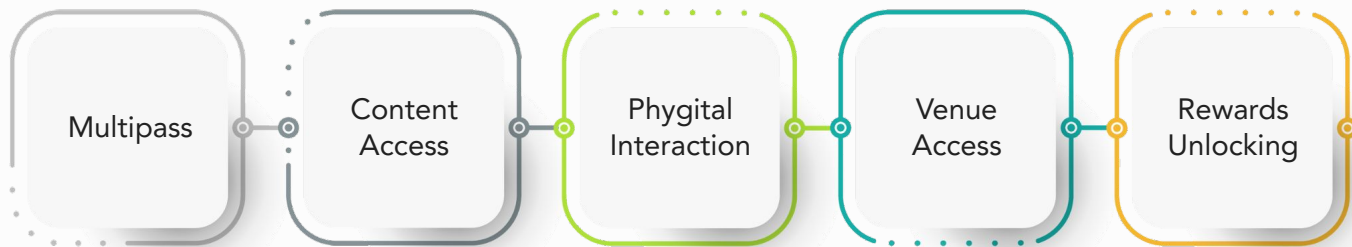

- AI
- Identity & Ownership
- Supply Chain Traceability
- Finance & Banking
- Brands & Marketing
- Media & Entertainment
- Retail & eCommerce

"Blockchain use cases need Wallet Access"

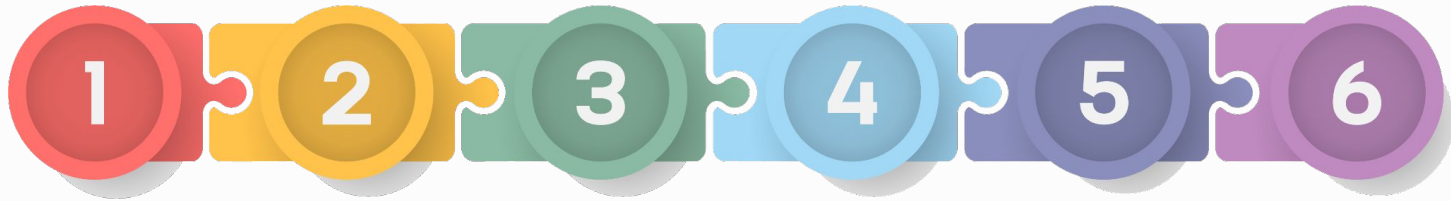

Token-Gating

| NFT Owners |

1 Works offline

No need for additional user devices.

2 Fast, Simple, Secure

Easy user onboarding, no need for existing blockchain wallet setup. Default wallet included.

3 Multi-Chain Multi-Wallet

Highly interoperable. Works wallet independent.

4 IRL Asset Transfer

Card can be "preloaded". User can claim assets at a later stage.

5 Brand Friendly

As a technology provider we serve a broad customer audience and are competitor friendly.

6 Highest Security

Engineered and build in Germany under highest industrial and cybersecurity standards.
